Invitation

Dear Colleagues,

It is a pleasure for me to invite all of you to the 9th International Congress for Ambulatory Surgery in Copenhagen in May 2011.

Ambulatory surgery is taking a leading position in the area of elective surgery.

Due to less invasive surgical procedures, more efficient anaesthetics and improved postoperative care and management we can expect this development to continue in the future.

We will in Copenhagen present the state of the art in ambulatory surgery and explore future possibilities. A mandatory part of the success of ambulatory surgery is the multi-disciplinary approach and this will be an important topic during the congress.

The congress will be organised by the Associations of Ambulatory Surgery in Denmark, Sweden, Norway and Finland in cooperation with the IAAS. We are confident that this broad Scandinavian cooperation will guarantee an excellent professional as well as social event.

We look forward to welcome you to Wonderful Copenhagen

Claus Toftgaard
