

## *Message from the Congress President*

Dear Colleague,

It is a pleasure to welcome delegates from all over the world to this *6th International Congress for Ambulatory Surgery* which takes place in Seville (Spain).

Seville is a welcoming city, well-known for its rich artistic and cultural background : the Islamic, the Jewish and the Christian cultures. Also its delicious gastronomy and excellent Mediterranean climate with an average temperature of 25 degrees centigrade in April, together with its hotel infrastructure, communications network, convention facilities and high quality services, make it an ideal location for international events.

I would like to thank the International Association for Ambulatory Surgery (IAAS) for considering and accepting the Spanish proposal to host the International congress of the IAAS that takes place in conjunction with the *7th Spanish National Congress of the Spanish association of major Ambulatory Surgery (ASECMA)*. The local Organizing Committee has worked enthusiastically to achieve the high standards that the IAAS requires concerning the meeting programme and other social and parallel activities as has been demonstrated in past Congresses (Brussels, London, Venice, Geneva and Boston).

The celebration of a biannual International Congress is essential to update scientific and educational knowledge, especially in young professionals around the world. I hope that the Scientific programme be of the utmost interest for all the professionals concerned with ambulatory surgery.

I also hope you enjoy social events , cultural and sightseeing opportunities that will make your stay in Seville unforgettable.

I wish to express my thanking our Industry sponsors for their outstanding collaboration, the IAAS , ASECMA , the different Committees that have made this magnificent Congress possible and Viajes y Congresos Tavora SL for their dedication to the organization of this event.

Dr. Juan Marín  
*Congress President*
