

## **Website Report 2023**

### **Dr Ian Jackson**

The website has undergone a complete redesign and change of host in the past 2 years. The change of host was important as now held on European servers under company Ionos (previously known as 1and1).

The website is registered secure, so we have earned the Site Secure Lock logo. The website hosting includes regular scanning and backup of our website for maximal security against hacking.

The other major change was to change to Wordpress software which is one of the commonest systems now in use.

While changing hosts we changed the registered name to [www.theiaas.net](http://www.theiaas.net) from www.iaas-med.org.

### **Statistics**

Theiaas.net

Currently over 1700 visitors a month

Ambulatorysurgery.org

Currently over 2,300 visitors a month

### **Newsletter**

Newsletter is sent using Vertical response – free service.
