

# Ambulatory Surgery in China

**Prof. Zhang Zhenzhong**

**President, China Ambulatory Surgery Association**

**Honorary Director, Center of Health Development and**

**Research, China Health Commission**

**Prague, Nov 24 2023**

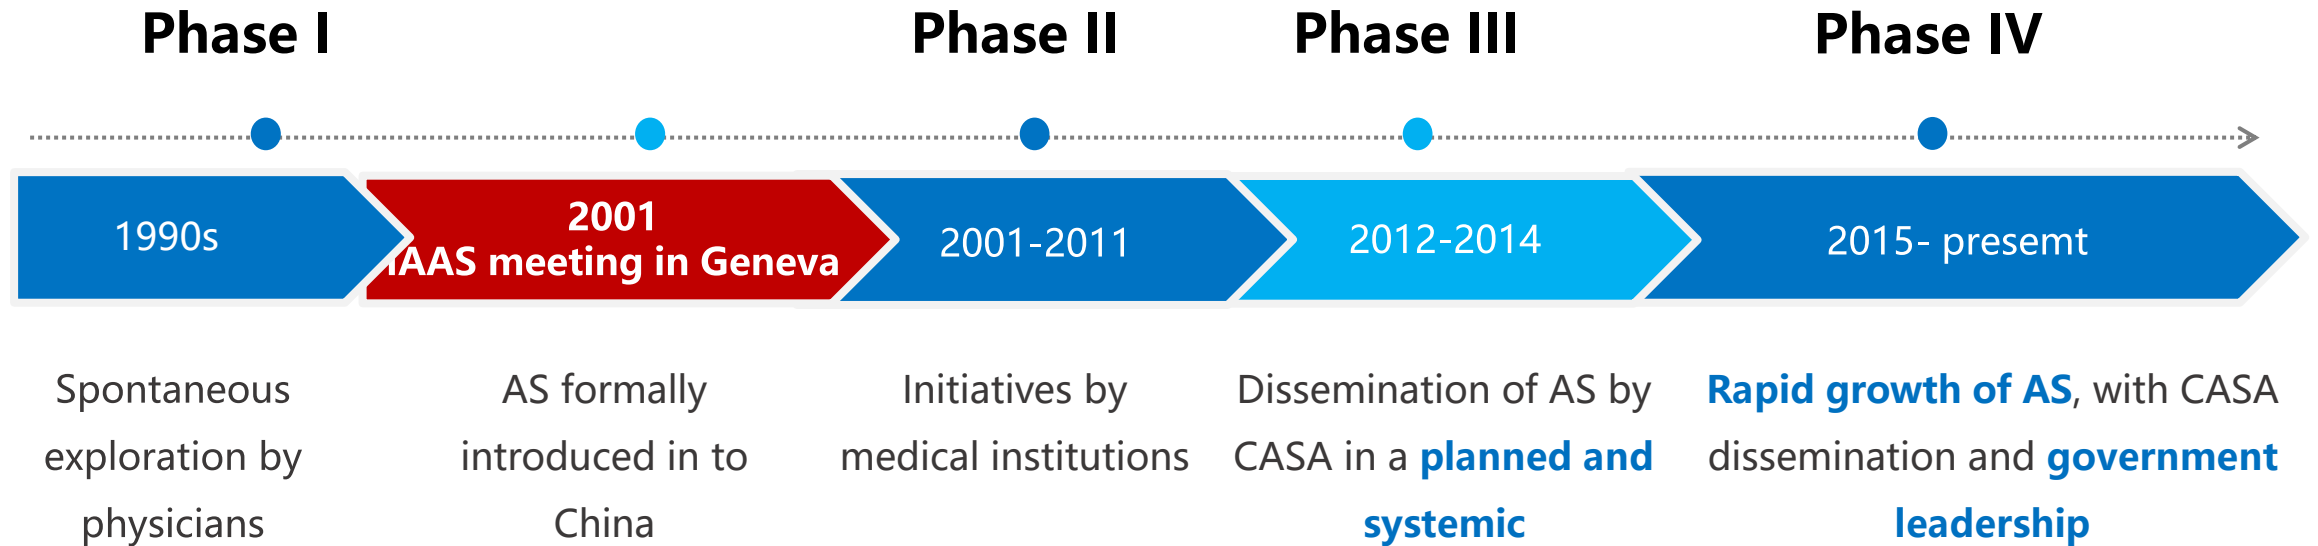

# 1. Basic Profile

Item	Date
<b>Population</b>	<b>1.413 billion</b>
<b>Province</b>	<b>34</b>
<b>No. of hospitals</b>	<b>36976</b>
Public hospitals	11746
Non-public hospitals	25230
<b>No. of visits in all hospitals</b>	<b>3.82 billion</b>
No. of visits in public hospitals	3.19 billion
No. of visits in non-public hospitals	630 million
<b>No. of discharges</b>	<b>202 million</b>
In public hospitals	164 million
In non-public hospitals	38 million
<b>No. of surgeries</b>	<b>76 million</b>
In public hospitals	66 million
In non-public hospitals	10 million

## 2. Development Phases of Ambulatory Surgery in China

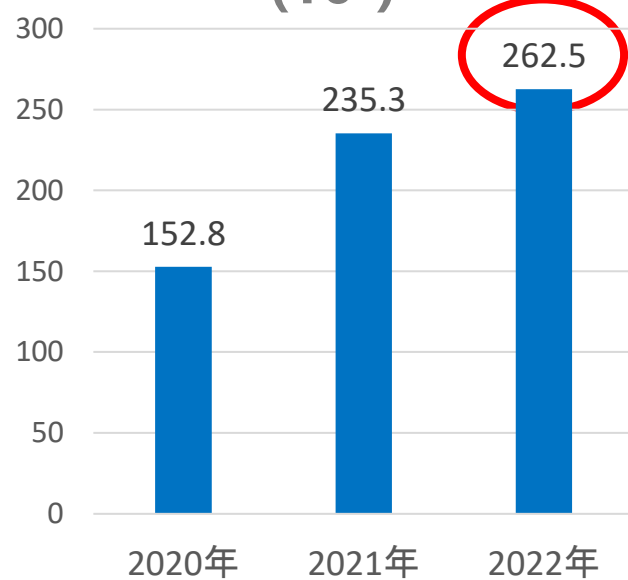

### 3. Development of AS in China

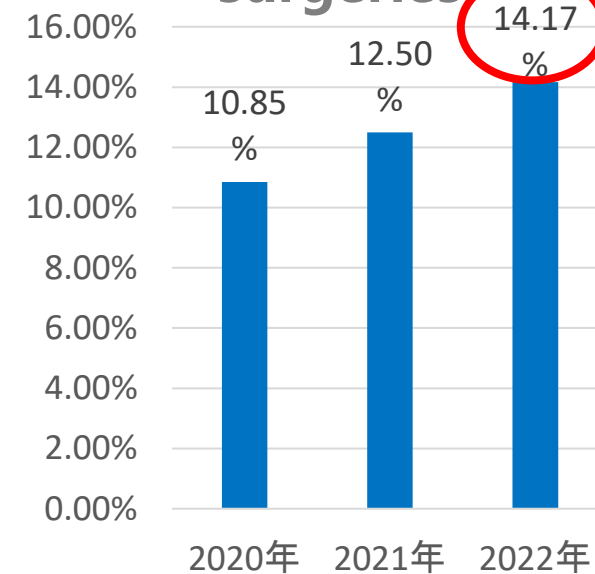

A. Hospitals delivering AS

B. No. of AS conducted (10<sup>4</sup>)

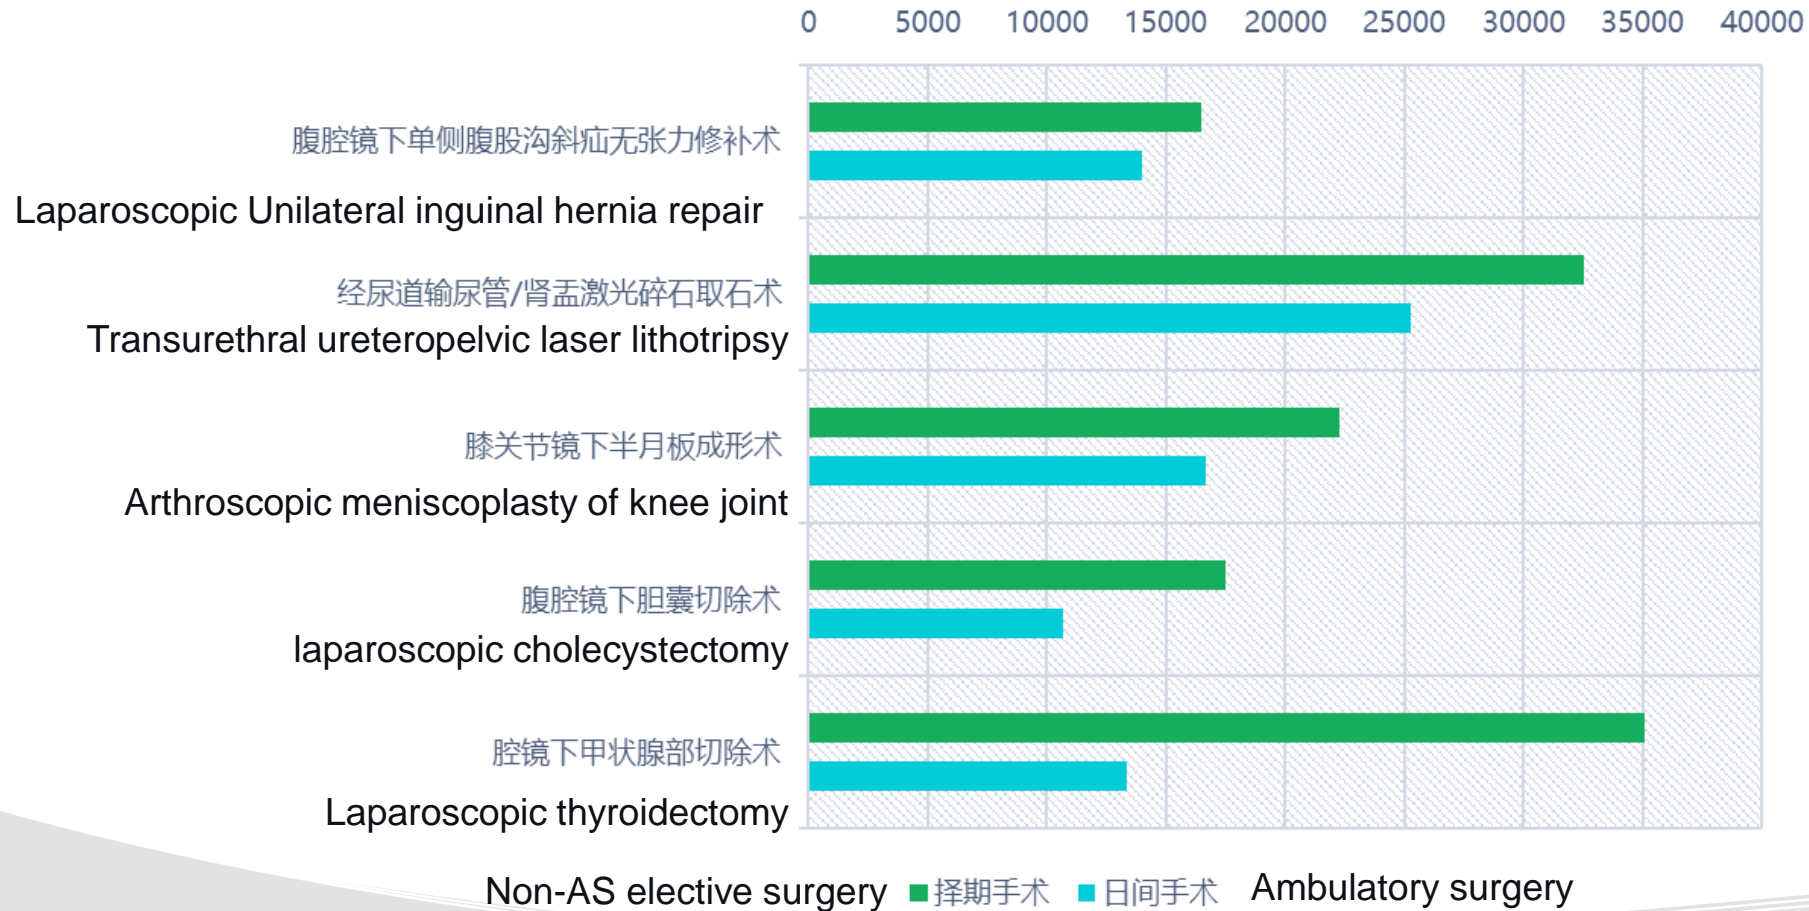

C. % of AS in all surgeries

- **over 1500 procedures** are now conducted in AS across China
- **708 AS procedures** are recommended to secondary hospitals and above
- **AS was incorporated as an important performance indicator for public hospitals. AS development is accelerating in China.**

# Cost analysis of representative procedures — comparison analysis of cost per intervention (Yuan), ambulatory surgery vs. non-AS elective surgery

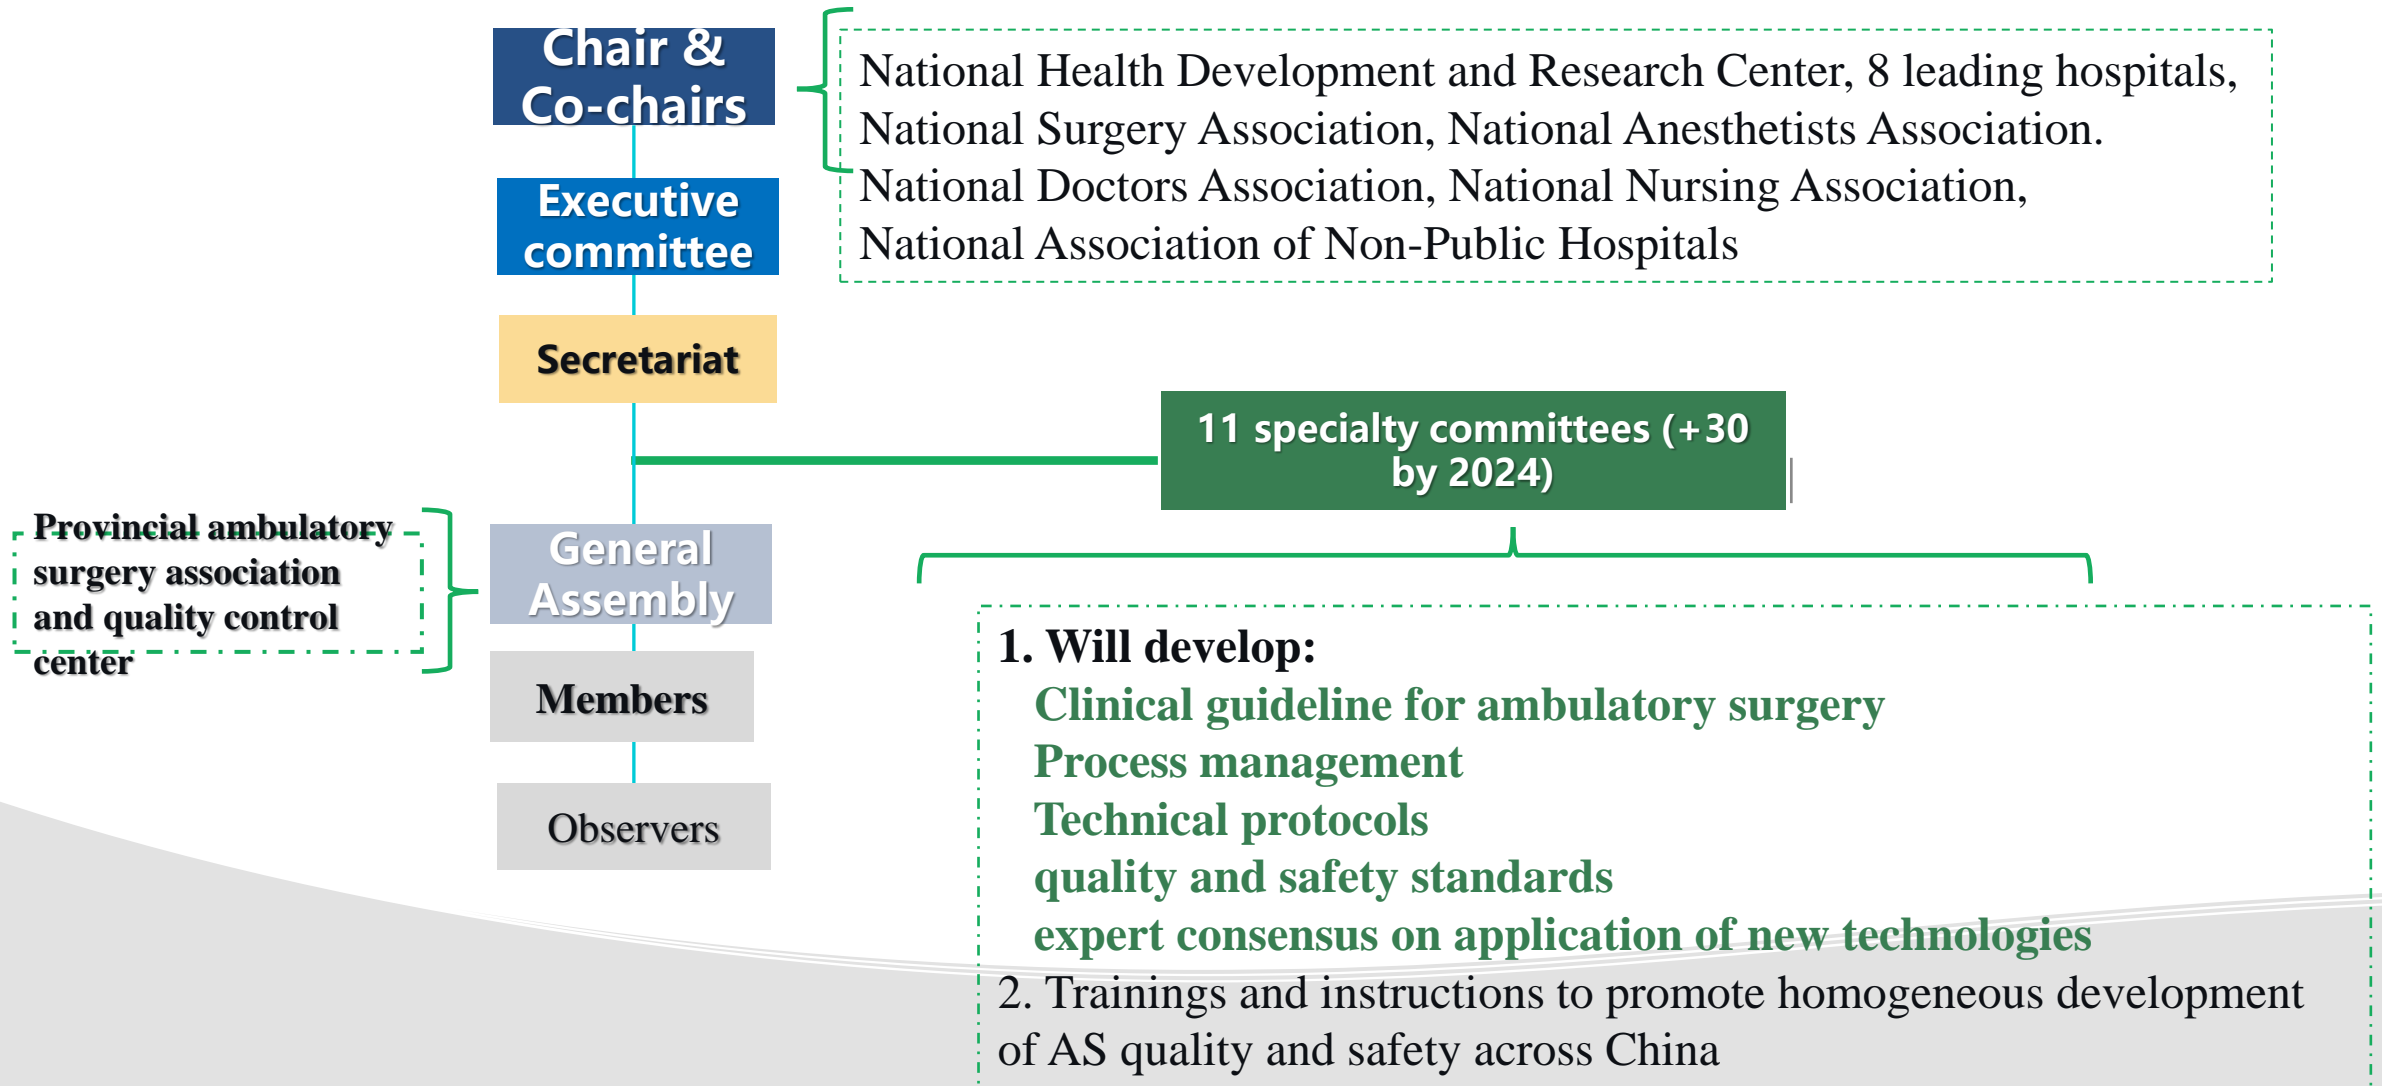

Comparison analysis was done on **cost per intervention** for 5 procedures including laparoscopic unilateral inguinal hernia repair.

Quoted from a speech by Chinese Vice Premier in Oct 2023

## 4. Organic Structure of CASA

## 5. High quality development of AS in China

- **Ten-Year Action Plan:**

Ten-Year Action Plan for Advancing High Quality and Homogeneous Development of Ambulatory Surgery by China Ambulatory Surgery Association (2023-2032)

- **Issued on:** Sep 15, 2023
- **Target:** advance high quality and homogeneous development of AS in China
- **Key actions:** 3 expansion and 1 increase

# 3 expansions

## 3 expansion of AS in China

1. Expansion of AS from first-tier cities to second and third-tier cities
2. Expansion of AS from tertiary hospitals to lower level (county/district level) hospitals
3. Expansion of AS experiences, best practices, technologies and management models to other developing countries in Asia and Africa

## 1 increase

Increase of AS capacity in China:

- AS capacity **needs assessment**
- AS capacity **enhancement measures**
- AS capacity **re-assessment system**

**Precise capacity building mechanism** for ambulatory surgery following assessment, enhancement and re-assessment.

# Thank you
